

P

(Printed Pages 4)

**17/78-C**

**B.C.A. (Fifth Semester) Examination, 2017**

**Paper : Second (502)**

**(Data Mining)**

**Time : Three Hours ] [ Maximum Marks : 70**

**Note :** Attempt questions from **all** sections as per instructions.

**Section - A**

**(Very Short Answer Questions)**

**Note:** Attempt **all** parts of this question. Give answer of each part in about 50 words.

$1\frac{1}{2} \times 10 = 15$

1. (i) List various kind of data mining.  
(ii) What is data warehouse?  
(iii) What is cross validation technique?  
(iv) Why data pre-processing required in data mining?  
(v) What is data warehouse metadata?  
(vi) List out the data mining functionalities.  
(vii) What is Association rule?

**P.T.O.**

(2)

(viii) Differentiate between Classification and Clustering.

(ix) What are the purpose of data cleaning.

(x) Give any two application of data mining.

**Section - B**

**(Short Answer Questions)**

**Note :** Attempt **all** questions. Give answer of each question in about 200 words.  $7 \times 5 = 35$

2. Explain the various data mining issues and functionality.

**OR**

Explain the importance of evaluation criteria for classification method.

3. What is concept description? Explain data generalization and summarization based characterization.

**OR**

Explain the steps involved in the process of knowledge discovery from database.

**17/78-C**

(3)

4. Explain the data warehouse architecture.

**OR**

Explain the method of data warehouse implementation.

5. What is Apriori algorithm? How it is used to find frequent item set?

**OR**

List and explain various issues in classification.

6. Explain the need of data mining in banking sector.

**OR**

Explain trends in data mining.

**Section - C**

**(Long Answer Questions)**

**Note:** Attempt any **two** questions. Give answer of each question in about **500** words.

$$10 \times 2 = 20$$

7. Explain-FP growth algorithm for discovering frequent item set.

17/78-C

P.T.O.

(4)

What are Bayesian Classifier? Explain Baye's theorem for classification.

9. Explain K-means clustering algorithm. What are its limitation?
10. List out the OLAP operations in multidimensional data model and explain with example.
11. Explain :
- (a) Database Miner
  - (b) Hierarchy generation
